Education

Glenwood House National Senior Certificate	2020
Stellenbosch University BSc Computer Science and Applied Mathematics	2021 - 2025
Stellenbosch University BSc Honours in Computer Science	2026

Experience

Lifeguard - Gwaing & Wilderness Beaches, Garden Route Beach safety and emergency response across two surf beach postings.	2018 - 2021
Waiter - Dorp Bar, Stellenbosch Customer service in a demanding and busy bar.	2023 - 2025
Tutor - Teach Me2 High school tutor in mathematics and IT.	2025 - present
Teaching Assistant - Stellenbosch University Demonstrator for Software Engineering 344. Mark tutorials and project.	2026

Honours Year

Thesis

A teaching tool for Interferometry. A space science concept and technique used to capture celestial sources in the radio frequency realm. Using Earth aperture synthesis and stitching together the results from an array of radio telescopes, celestial sources can be captured in great detail. The goal of this project was pedagogical and software orientated.

Course Work

Functional Programming, Artificial Intelligence (Swarm Intelligence) and Computing and Society.
Space Science algorithms, Principles of Data Science and Computer Vision.

Projects

Optimise MeerKAT16 uv coverage A comparative study into comparing heuristic Genetic Algorithms vs Simulated Annealing for finding optimal uv coverage for 16 MeerKAT antennas.	github.com/Jordy-Ward/uv-coverage
Large Scale Optimisation benchmark Implementing a stochastic scaling and subspace initialisation hybrid large scale optimisation algorithm and studying its effectiveness.	github.com/Jordy-Ward/LSOPS-benchmark
Differential Evolution Study of different cross over operators in differential evolution algorithms.	github.com/Jordy-Ward/Differential-Evolution
Data School Hackathon 2026 Ten day hackathon hosted by the School for Data Science and Computational Thinking and sponsored by Standard Bank.	Stellenbosch University

Prescient Coding Challenge 2025 github.com/Jordy-Ward/prescient-coding-challenge-2025
Data analysis solution presented by team DualBoot at the Prescient Investment Management hackathon.

Skills

Languages	Java, Python, JavaScript, C, Haskell
Frameworks	React, Spring Boot
Tools	Git, PostgreSQL, LaTeX, Linux, MPI, OpenMP, REST API, Supabase, Neo4j
